23. Appendix D: Full route list

1. Introduction

Dashboard (Main → Dashboard)

The dashboard is the home page after sign-in. It shows counts and shortcuts based on your role (for example leave approvals for managers, payroll status for HR, your employee ID for staff). Use the sidebar to go to detailed screens.

AyurCentral HRMS is a browser-based Human Resource Management System. Your company uses it to keep employee records, process leave, record attendance, run payroll, and manage hiring.

This manual is written in simple English. It was built by reading your actual Apps Script project export, so it matches the screens and labels in your deployed app.

What you need

- A computer or phone with a modern browser (Chrome recommended).
- Your company Google account (work email).
- The HRMS web app URL from IT or HR (usually ends with /exec).

2. Sign in and daily use

2.1 First visit

- 1 Open the HRMS link in your browser.
- 2 Choose your Google work account when Google asks you to sign in.
- 3 Wait for the dashboard to load. The left side shows the menu.
- 4 If you see an error about access, your login is not set up yet. Contact Admin or HR.

2.2 Parts of the screen

- **Sidebar (left):** Sections such as Main, My Work, People, Time Off, Attendance, Payroll, Recruitment, System. Click a section name to expand or collapse it.
- **Top bar:** Page title, notification bell, your name and role, Sign out.
- **Main page:** Forms, tables, and buttons for the task you selected.
- **Refresh:** Many pages have a refresh control to reload data from the server.
- **Ask HR:** Floating help button to ask HR questions (when enabled).

2.3 Sign out

Always click **Sign out** when you finish on a shared computer.

2.4 After an app update

Press **Ctrl+Shift+R** (Windows) or **Cmd+Shift+R** (Mac) once to hard refresh if menus or buttons look old.

3. Roles and access

Each user has a **role**. The role controls which menu items appear.

Role	Typical access
EMPLOYEE	Dashboard; My Work (profile, leave, payslips if enabled). Cannot open company employee list or payroll admin.
MANAGER	Everything Employee has, plus My Team and Leave Approvals. May see Recruitment if Admin allows.
HR	People, leave admin, attendance, payroll, recruitment, notifications, settings (no full owner powers).
ADMIN	Same as HR plus full settings; Users screen may show 'coming soon' in this build.
OWNER	Full access to all modules. Module checkboxes in Settings do not limit OWNER.

Admin can change which modules each role sees under **System** → **Settings** → **HRMS module access by role**. If a menu is missing, ask Admin before reporting a bug.

4. Menu and screens

The left menu is split into sections. Open a section to see pages inside it. The table below lists each page, who normally uses it, and what it is for.

Main

Screen	Who can open it	What you do here
Dashboard	Owner, Admin, HR team, Managers, All staff	Use this page for dashboard tasks.

My Work

Screen	Who can open it	What you do here
My Profile	Owner, Admin, HR team, Managers, All staff	Your employee record and the details you are allowed to see.
My Leave	Owner, Admin, HR team, Managers, All staff	Balances for the current leave year and your requests.
My Payslips	Owner, Admin, HR team, Managers, All staff	Your locked payslips. Amounts come from the payroll snapshot.

People

Screen	Who can open it	What you do here
Employees	Owner, Admin, HR team	Use this page for employees tasks.
Mandatory fields	Owner, Admin, HR team	Choose which employee fields are required on create and bulk upload.
My Team	Managers	Direct reports. Open a row to view work details.

Time Off

Screen	Who can open it	What you do here
Leave	Owner, Admin, HR team	Company leave requests and configurable leave types.
Leave Approvals	Owner, Admin, HR team, Managers	Submitted requests waiting for a decision.

Attendance

Screen	Who can open it	What you do here
Register	Owner, Admin, HR team	Monthly attendance register (Form XVII style): daily codes, summaries, and payroll day counts.
Form T	Owner, Admin, HR team	Statutory Form T Excel export per vertical for the selected payroll month.

Payroll

Screen	Who can open it	What you do here
Salary structure	Owner, Admin, HR team	Create reusable salary structure templates (vertical + component percentages) and assign them to employees.
Salary Statement	Owner, Admin, HR team	Monthly cost-to-company breakdown by employee from structure templates and CTC.
Payroll	Owner, Admin, HR team	Use this page for payroll tasks.

Recruitment

Screen	Who can open it	What you do here
Recruitment	Owner, Admin, HR team, Managers	Use this page for recruitment tasks.

Jobs	Owner, Admin, HR team, Managers	Create, publish, and share requisitions.
Candidates	Owner, Admin, HR team, Managers	Applicants for jobs you can access.

System

Screen	Who can open it	What you do here
Notifications	Owner, Admin, HR team	Use this page for notifications tasks.
Settings	Owner, Admin, HR team	Use this page for settings tasks.
Users (coming soon)	Owner, Admin	Use this page for users tasks.

5. Admin: Settings and system

Go to **System** → **Settings**. Only HR and Admin roles see this in your export.

Welcome messaging

Turn email notifications on or off (leave, payroll, welcome mail, etc.). When off, the system may still log the event under Notifications as SKIPPED.

Email & welcome toggles

Turn email notifications on or off (leave, payroll, welcome mail, etc.). When off, the system may still log the event under Notifications as SKIPPED.

HRMS module access by role

This table lists modules (Dashboard, Employees, Payroll, Attendance, etc.) against roles Employee, Manager, HR, Admin. Check a box to allow that role to see and use the module in the sidebar.

- 1 Change checkboxes as needed.
- 2 Scroll down and click **Save settings**.
- 3 Tell affected users to refresh the browser.

New login defaults (self-service)

Sets default self-service rights when a new login is created: download documents, upload documents, payslips, leave. You can still change per employee later.

Content templates

Edit wording for welcome emails, bulk upload help text, and ATS offer letters. Use placeholders shown on the settings page.

Notifications (System → Notifications)

HR and Admin can read in-app notifications and review email log entries. Use this to confirm whether emails were sent or skipped.

Users menu is marked coming soon in your export. User roles are managed through your existing user setup (spreadsheet / admin process).

6. HR: Employee records

Open **People** → **Employees**. You can search by employee ID or name and filter by status, department, location, and vertical.

Buttons on the Employees page

- **Mandatory fields** - open the checklist of required fields (if present in your build).
- **Custom fields** - define extra columns for profiles and bulk upload.
- **Bulk upload** - import many employees from Excel or CSV.
- **Add employee** - create one employee.
- **Refresh** - reload the directory list.

6.1 Add one employee

- 1 Click **Add employee**.
- 2 Fill every field that has a red star (*). Stars follow your Mandatory fields settings.
- 3 Employee code must match your format (for example SAPL-0001, AOPL-0001, AOMS-0001).
- 4 Employment type is usually one of: PERMANENT, CONTRACT, INTERN, CONSULTANT.
- 5 Choose the correct **vertical** for the employee.
- 6 Bank: if you enter account number, IFSC is usually required (unless Mandatory fields say otherwise).
- 7 Click save. Fix any red error messages and try again.

6.2 Employee profile

Click a row in the directory to open the profile. Your build includes these areas:

- **Personal** - edit or view details in this section (HR permissions apply).
- **Employment** - edit or view details in this section (HR permissions apply).
- **Payroll** - edit or view details in this section (HR permissions apply).
- **Documents** - edit or view details in this section (HR permissions apply).
- **Payslips** - edit or view details in this section (HR permissions apply).
- **Access** - edit or view details in this section (HR permissions apply).

HR can upload documents, change status (active/inactive), send welcome email, and manage app login access from the profile where those buttons appear.

Fields on the employee form (your build)

Field	Label on screen
employee_id	Employee code
first_name	First name

last_name	Last name
display_name	Display name
father_husband_name	Father / husband name
date_of_birth	Date of birth
gender	Gender
phone	Phone
address	Address
work_email	Work email
department	Department
designation	Designation
vertical_name	Vertical
manager_employee_id	Manager
joining_date	Joining date
employment_type	Employment type
location	Location
salary_structure_id	Salary structure
ctc_monthly	Monthly CTC
uan_no	UAN no.
esi_no	ESI no.
pf_no	PF no.
pan	PAN
bank_account_name	Bank account name
bank_account_number	Bank account number
bank_ifsc	IFSC
bank_name	Bank name
notes	Notes (HR only)
google_login_email	Google login email
acc-role	HRMS role

Payroll fields include UAN, ESI, PF, PAN, bank details, salary structure, and monthly CTC. Statutory numbers may be optional unless Mandatory fields require them.

6.3 Bulk upload

- 1 From Employees, open **Bulk upload**.
- 2 Download the template (new hire or legacy/existing employee variant).
- 3 Fill one row per employee. Do not rename header columns.
- 4 Upload the file. Wait for validation.
- 5 Review errors per row. Fix the file and re-upload if needed.
- 6 Confirm import only when all rows you need are valid.

Rules printed in your template

- After upload, review validation results before confirming import.
- Legacy / existing employees - set create_login to NO unless issuing portal access now.
- New hires - use create_login YES when creating Google sign-in.
- Required columns are marked with * in the Employees sheet header row.
- Employee code format: SAPL-0001, AOPL-0001, AOMS-0001 (provided by HR, not auto-generated).
- Dates must be YYYY-MM-DD.
- create_login: YES or NO. If YES, google_login_email is required.
- System role is always EMPLOYEE on create. Admin assigns HR/Manager/Admin separately.
- manager_employee_id must already exist in HRMS (e.g. SAPL-0005).
- Do not change header names on the Employees sheet.

Maximum rows per upload is limited in software (commonly 100). Split large files if needed.

6.4 Mandatory fields

Path: **People** → **Mandatory fields** or the button on Employees.

- 1 Review fields grouped by Identity, Contact, Work, Payroll, Bank, etc.
- 2 Tick **Mandatory** for fields that must be filled on create and bulk upload.
- 3 Employee code cannot be turned off.
- 4 Click **Save**. The page reloads so forms and templates match.

After save, single employee forms show red stars on required fields. Bulk templates mark required columns with * in the header row.

6.5 Custom fields

- 1 Open **Custom fields** from Employees.
- 2 Enter field key (lowercase, underscores, e.g. blood_group) and label.

- 3 Mark Active if the field should appear on forms and bulk template.
- 4 Save. New columns appear on bulk upload after save.

7. HR: Leave

7.1 Leave administration (Time Off → Leave)

Company leave requests and configurable leave types.

HR uses this area to:

- Configure leave types (annual, sick, etc. as your company set up).
- View and manage employee leave requests and balances.
- Support corrections according to company policy.

7.2 Leave approvals (Time Off → Leave Approvals)

Submitted requests waiting for a decision.

- 1 Open Leave Approvals.
- 2 Select a pending request.
- 3 Approve or reject. Add a comment if your process requires it.
- 4 Employee and manager may receive email if toggles are on in Settings.

7.3 Employee leave apply (for reference)

Employees use **My Leave → Apply**. Dates are counted on the server. Half-day is 0.5 when the type allows it.

8. HR: Attendance

8.1 Register (Attendance → Register)

Monthly attendance register (Form XVII style): daily codes, summaries, and payroll day counts.

- 1 Select payroll month and vertical if the screen asks.
- 2 Download the attendance template.
- 3 Enter one attendance code per day for each employee.
- 4 Upload the file and review validation messages.
- 5 Confirm when data is correct.

8.2 Form T (Attendance → Form T)

Statutory Form T Excel export per vertical for the selected payroll month.

Choose payroll period and vertical, then generate or download the Form T Excel export as per your statutory process.

9. HR: Payroll and salary

9.1 Salary structure

Create reusable salary structure templates (vertical + component percentages) and assign them to employees.

Create templates with earning/deduction components. Assign a structure and monthly CTC on the employee profile for payroll to work.

9.2 Salary Statement

Monthly cost-to-company breakdown by employee from structure templates and CTC.

9.3 Payroll run (Payroll → Payroll)

One primary next step. Locked amounts never change.

Typical monthly flow:

- 1 Open the payroll month you need.
- 2 Sync or load employees for that run.
- 3 Enter or import attendance / LOP adjustments if your process uses them.
- 4 Save inputs.
- 5 Calculate payroll and review amounts.
- 6 Fix errors (missing bank, structure, etc.) before finalize.
- 7 Finalize or lock the run when numbers are approved.
- 8 Generate payslips. Employees see them under My Payslips when enabled.

Locked payroll amounts do not change. Use correction run features in the app if your build includes them.

10. HR: Recruitment (ATS)

Menus: **Recruitment, Jobs, Candidates.**

- **Jobs** - Create, publish, and share requisitions.
- **Candidates** - Applicants for jobs you can access.
- Job detail pages support pipeline stages, interviews, and public apply links.
- Hired candidates are not automatic employees; create them in Employees when they join.

11. Manager tasks

- **My Team** - Direct reports. Open a row to view work details.
- **Leave Approvals** - act on team leave requests promptly.
- **My Leave / My Profile / My Payslips** - same as any employee.
- Recruitment screens if Admin enabled Manager access.

12. Employee self-service

12.1 My Profile

Your employee record and the details you are allowed to see.

12.2 My Leave

Balances for the current leave year and your requests.

- 1 Check balance for the leave year shown.
- 2 Click apply, pick dates and leave type.
- 3 Submit and wait for approval.
- 4 Track status under your request list.

12.3 My Payslips

Your locked payslips. Amounts come from the payroll snapshot.

13. Notifications

Use the bell icon for unread items. HR/Admin can open the Notifications page for full history and email log.

14. Troubleshooting

Problem	What to do
Cannot sign in	Confirm Google account; ask Admin to add user with correct role.
Menu item missing	Admin: check Settings → module access for your role.
Save does not update screen	Hard refresh (Ctrl+Shift+R). Wait for save spinner to finish.
Bulk upload errors	Check employee code format, duplicate emails, required * columns, date format YYYY-MM-DD.
Payroll will not finalize	Complete bank details, salary structure, CTC; read error message on screen.

No payslip	Payroll must be finalized; Admin must allow payslips for your role in Settings.
------------	---

Appendix A: Bulk upload columns

Columns in the employee bulk template in your export:

#	Column name	Notes
1	employee_id	Required. Company format e.g. SAPL-0001.
2	first_name	See mandatory fields; may be optional.
3	last_name	See mandatory fields; may be optional.
4	display_name	See mandatory fields; may be optional.
5	father_husband_name	See mandatory fields; may be optional.
6	uan_no	See mandatory fields; may be optional.
7	esi_no	See mandatory fields; may be optional.
8	pf_no	See mandatory fields; may be optional.
9	work_email	See mandatory fields; may be optional.
10	department	See mandatory fields; may be optional.
11	designation	See mandatory fields; may be optional.
12	vertical_name	Must match company vertical list.
13	location	See mandatory fields; may be optional.
14	employment_type	PERMANENT, CONTRACT, INTERN, CONSULTANT
15	joining_date	YYYY-MM-DD.
16	salary_structure_id	See mandatory fields; may be optional.
17	ctc_monthly	See mandatory fields; may be optional.
18	manager_employee_id	See mandatory fields; may be optional.
19	phone	See mandatory fields; may be optional.
20	address	See mandatory fields; may be optional.
21	date_of_birth	See mandatory fields; may be optional.
22	gender	See mandatory fields; may be optional.
23	pan	See mandatory fields; may be optional.
24	bank_account_name	See mandatory fields; may be optional.
25	bank_account_number	See mandatory fields; may be optional.

26	bank_ifsc	See mandatory fields; may be optional.
27	bank_name	See mandatory fields; may be optional.
28	notes	See mandatory fields; may be optional.
29	create_login	YES or NO for Google login on import.
30	google_login_email	Required when create_login is YES.

Appendix B: Mandatory field catalog

Identity

Label	Field id	Default mandatory
Employee code	employee_id	Yes
First name	first_name	Yes
Last name	last_name	Yes
Display name	display_name	No
Father / husband name	father_husband_name	No
Date of birth	date_of_birth	No
Gender	gender	No

Contact

Label	Field id	Default mandatory
Phone	phone	No
Address	address	No

Work

Label	Field id	Default mandatory
Work email	work_email	Yes
Department	department	Yes
Designation	designation	Yes
Vertical	vertical_name	Yes
Manager employee ID	manager_employee_id	No
Joining date	joining_date	Yes

Employment type	employment_type	Yes
Location	location	Yes

Payroll

Label	Field id	Default mandatory
Salary structure	salary_structure_id	No
Monthly CTC	ctc_monthly	No
UAN no.	uan_no	No
ESI no.	esi_no	No
PF no.	pf_no	No
PAN	pan	No

Bank

Label	Field id	Default mandatory
Bank account name	bank_account_name	No
Bank account number	bank_account_number	No
IFSC	bank_ifsc	No
Bank name	bank_name	No

Other

Label	Field id	Default mandatory
Notes (HR)	notes	No

Bulk login

Label	Field id	Default mandatory
create_login (bulk)	create_login	Yes
Google login email	google_login_email	No

Appendix C: Attendance day codes

Use one code per day in the Register upload:

Code	Meaning
------	---------

P	Present
W/H or WH	Work from home
A	Absent
L	Leave
WO	Weekly off
ML	Maternity leave (legacy import may use S)
H	Holiday

Appendix D: Full route list

Route id	Title	Description
ats-candidate	Candidate	Profile, applications, interviews, and notes.
ats-candidates	Candidates	Applicants for jobs you can access.
ats-job	Job	Applications, pipeline, and the public apply link.
ats-job-edit	Edit job	Update the requisition. Candidates are not employees.
ats-job-new	New job	Describe the role. Publishing creates the careers link.
ats-jobs	Jobs	Create, publish, and share requisitions.
attendance-bulk-upload	Register	Monthly attendance register (Form XVII style): daily codes, summaries, and payroll day counts.
attendance-form-t	Form T	Statutory Form T Excel export per vertical for the selected payroll month.
employee-bulk-upload	Bulk upload	Import many employees from Excel or CSV.
employee-create	Add employee	Employee ID is assigned on save. Payroll identifiers are optional.
employee-field-defs	Employee custom fields	Define optional extra columns for profiles and bulk upload.
employee-mandatory-fields	Mandatory fields	Choose which employee fields are required on create and bulk upload.
employee-profile	Employee	Employee master record.
leave-admin	Leave	Company leave requests and configurable leave types.

leave-apply	Apply Leave	Dates are counted on the server. Half-day is 0.5 when the type allows it.
leave-approvals	Leave Approvals	Submitted requests waiting for a decision.
leave-calendar	Leave Calendar	Approved leave for the month, scoped to your role.
my-leave	My Leave	Balances for the current leave year and your requests.
my-payslips	My Payslips	Your locked payslips. Amounts come from the payroll snapshot.
my-profile	My Profile	Your employee record and the details you are allowed to see.
my-team	My Team	Direct reports. Open a row to view work details.
payroll-run	Payroll run	One primary next step. Locked amounts never change.
salary-statement	Salary Statement	Monthly cost-to-company breakdown by employee from structure templates and CTC.
salary-structure	Salary structures	Create reusable salary structure templates (vertical + component percentages) and assign them to employees.
