1. About this app

AyurCentral HRMS is a web app you open in a browser. You sign in with your Google account. The app helps your company manage people, leave, attendance, payroll, and recruitment.

This manual matches the code in your export file (not a generic branch). It lists 0 menu items and 101 project files.

2. Sign in

1. Open the HRMS web app link from your IT or HR team (URL ends with /exec).
2. Sign in with your work Google email.
3. If you see access denied, ask Admin to add your user and role.

Layout: menu on the left, your name and notifications on top, main page in the center. Use the **Ask HR** button for help questions when it is on screen.

3. Roles

Role	What they usually do
EMPLOYEE	My Profile, My Leave, My Payslips (if enabled).
MANAGER	Same as employee plus My Team and Leave Approvals.
HR	Employees, leave admin, attendance, payroll, recruitment, settings.
ADMIN	Full access including settings; Users menu may be limited.
OWNER	Full access (same as admin for daily use).

4. Menu map

Attendance

Payroll

Recruitment

System

5. Admin guide

Settings

Open **System - Settings**. Sections in your build:

- Welcome messaging
- Email & welcome toggles
- HRMS module access by role
- New login defaults (self-service)
- Content templates

Use **HRMS module access by role** to show or hide menu areas per role. Use **New login defaults** for documents, payslips, and leave self-service. Click Save at the bottom. Ask users to refresh the browser after changes.

6. HR guide

Employees

- Search and filter the directory; open a row for the full profile.
- **Add employee** - one person at a time. Fields with a red star are required.
- **Bulk upload** - import many rows from Excel or CSV template.
- **Custom fields** - add extra columns for profiles and bulk upload.
- **Mandatory fields** - choose which fields are required on create and bulk upload.
- Employee codes in bulk upload use format like: SAPL-0001, AOPL-0001, AOMS-0001.

Leave

Leave (admin) for company requests and leave types. **Leave Approvals** for pending decisions.

Attendance

Register - monthly attendance bulk upload. **Form T** - Form T Excel export by vertical.

Payroll

Salary structure templates, **Salary Statement** reports, **Payroll** monthly run (calculate, finalize, payslips).

Recruitment

Recruitment, **Jobs**, and **Candidates** for hiring workflow.

7. Manager guide

- **My Team** - view direct reports.
- **Leave Approvals** - approve or reject team leave.
- Recruitment screens if your Admin enabled them for managers.

8. Employee guide

- **My Profile** - your record and allowed documents.
- **My Leave** - balances and apply for leave.
- **My Payslips** - download payslips when your role allows.

9. Screen-by-screen reference

Short description for each route defined in your app:

Menu / screen	What it does
Candidate (sub-page)	Profile, applications, interviews, and notes.
Candidates (sub-page)	Applicants for jobs you can access.
Job (sub-page)	Applications, pipeline, and the public apply link.
Edit job (sub-page)	Update the requisition. Candidates are not employees.
New job (sub-page)	Describe the role. Publishing creates the careers link.
Jobs (sub-page)	Create, publish, and share requisitions.
Register (sub-page)	Monthly attendance register (Form XVII style): daily codes, summaries, and payroll day counts.
Form T (sub-page)	Statutory Form T Excel export per vertical for the selected payroll month.
Bulk upload (sub-page)	Import many employees from Excel or CSV.
Add employee (sub-page)	Employee ID is assigned on save. Payroll identifiers are optional.
Employee custom fields (sub-page)	Define optional extra columns for profiles and bulk upload.
Mandatory fields (sub-page)	Choose which employee fields are required on create and bulk upload.
Employee (sub-page)	Employee master record.
Leave (sub-page)	Company leave requests and configurable leave types.
Apply Leave (sub-page)	Dates are counted on the server. Half-day is 0.5 when the type allows it.
Leave Approvals (sub-page)	Submitted requests waiting for a decision.
Leave Calendar (sub-page)	Approved leave for the month, scoped to your role.
My Leave (sub-page)	Balances for the current leave year and your requests.
My Payslips (sub-page)	Your locked payslips. Amounts come from the payroll snapshot.
My Profile (sub-page)	Your employee record and the details you are allowed to see.

My Team (sub-page)	Direct reports. Open a row to view work details.
Payroll run (sub-page)	One primary next step. Locked amounts never change.
Salary Statement (sub-page)	Monthly cost-to-company breakdown by employee from structure templates and CTC.
Salary structures (sub-page)	Create reusable salary structure templates (vertical + component percentages) and assign them to employees.

10. Help and tips

- After an app update, press Ctrl+Shift+R once for a hard refresh.
- Wait for the Save button to finish; do not double-click.
- Bulk upload errors often mean wrong employee code, duplicate email, or missing required columns.
- For company policy (how much leave, pay dates), follow your HR policy - this manual is only for the software.
